Municipal Emergency Management Committee Request for Decision	
Meeting Date: March 6, 2017	
Subject: Medical First Responder (MFR)	
Recommendation:	That the Municipal Emergency Management Committee accepts the material received in this Agenda Item as information.
Background:	<p>The Medical First Responder (MFR) program was launched on December 1, 2016. In the first 3 months the Taber Fire Department has been dispatched to 33 MFR calls. The calls have found the Department working very well with the EMS crews and an unmeasurable benefit to the residents and visitors of Taber.</p> <p>Multiple calls have been of a critical nature and the Fire Department has been able to assist in procedures and/or supplying a driver allowing all EMS staff to be in the back with the patients.</p> <p>Two of the more serious calls were 1) The assault with the shovel, where the Fire Department was able to jump in and help at the scene, supply driver and assist at the hospital. 2) An opiate overdose for an unconscious female where the Fire Department arrived at the same time as an ambulance from Medicine Hat that was returning from a transfer and was the closest ambulance. The fire crew was able to assist the EMS crew with breathing and the administration of Naloxone (a.k.a. Narcan). The fire crew was also then able to guide the ambulance crew to the hospital.</p> <p>The Alberta Health Minister has issued a Ministerial Order allowing MFR programs to train, carry and administer Naloxone at a Standard First Aid Level, our training and implementation of this will be in place before the end of March, 2017.</p>
Legislation / Authority:	MGA, Section 207(c)
Strategic Plan Alignment:	<p>Governance:</p> <p>Examine service delivery at the department level and confirm if resources are aligned appropriately.</p>

Financial Implication:	Staff time will be integrated within training time already budgeted. The Naloxone kits are supplied by Alberta Health Services.
Service Level / Staff Resource Implication:	Standard First Aid level of service can remain the same for the MFR program as well as the implementation of the Naloxone program.
Justification:	To keep the Municipal Emergency Management Committee informed of departmental happenings.
Alternative(s):	The Municipal Emergency Management Committee could seek clarification on any of the matters from Administration or fellow Committee Members.

Algorithm 28 Overdose – Opioid

Date: February 13, 2017

To: Emergency Medical Services Personnel (Direct Delivery and Contract providers)

From: Blaine Barody, Manager Medical First Response

RE: Launch of provincial naloxone strategy for Medical First Response

In response to the increasing number of opioid overdoses, AHS has developed a provincial strategy to support Medical First Response (MFR) Agencies who wish to carry and administer naloxone. MFRs are defined as agencies trained and equipped to provide medical assistance prior to EMS arrival and are routinely activated by the 9-1-1 EMS dispatch system.

As a result of recently announced Ministerial Orders, both regulated and non-regulated first responders are now permitted to carry and administer naloxone to patients. EMS personnel will begin to see more naloxone administered by MFRs across the province.

MFRs can provide valuable support to opioid overdose response when naloxone is combined with critical airway and ventilation assistance, but it is reinforced that naloxone does not replace other emergency care. Use of naloxone by MFRs is supported by the Medical Oversight and Quality Assurance processes in place with the Alberta MFR Program.

MFR Agencies may choose to carry the following types of naloxone:

- Intramuscular injection naloxone kits (0.4mg/dose)
- Intranasal naloxone in the form of **NARCAN**[®] Nasal Spray (4mg/dose)

A provincial naloxone training module is available for all MFRs (Standard First Aid and higher) and covers both the IM and IN methods of administration. MFRs are instructed to provide a verbal report to the arriving EMS crew, indicating their findings, confirming use of naloxone, dosage, route and time of administration. Please ensure these details are documented in the EMS Patient Care Report as treatment provided prior to arrival.

Naloxone training for AHS EMRs will be communicated in a forthcoming announcement from EMS Learning & Development.

Further information about naloxone use by our MFR partners is available on the MFR Portal Naloxone webpage: <https://www.albertamfr.ca/theme/common/page.cfm?i=11725>

The MFR Program can be reached with any questions at mfr@ahs.ca.
